

Global Health Program
National Taiwan University
2022 Summer Course

The Historical and Cultural Context of Health Behavior

Diversity, Narration, and Care

Adapting B.F. Skinner's classic book in establishing the foundations of behavioral science *Beyond Freedom and Dignity* (1971), this course aims at examining the historical background and cultural elements behind health behaviors in order to investigate, consider, and debate on the humanly constructed "environment" as opposed to bio-physically, genetically, based conditions of critical social conducts."

Summer Course

July 22-23; 29-30

9:00-17:00

Course Director:

Hsiung Ping-Chen
The Chinese University of Hong Kong
